February 22, 1967

To: All Shelby American Dealers  
Subject: Product Change, Standard Wheels

The purpose of this letter is to inform you of a change in the standard wheel that we will supply with the Shelby American GT-350, GT-500. As you are aware, our specification sheets, owners manual and other literature had noted 6.5" for the standard wheel. We have experienced considerable difficulty with vendors in supplying this particular size and all units shipped in the future will have a 6" standard wheel. We have chosen this avenue to expedite delivery of the standard wheel, as up to this point, all units have been available only with a deluxe wheel at a dealer net of \$151.74. This deluxe 7" wheel will still be available as an extra cost item. However, we are cognizant that in many instances the actual retail customer would prefer to forego the added expense of this option and we have found it necessary to make this substitution. Initial comparisons here at Shelby American indicates that these 6" wheels are comparable to the 6.5" wheel and the average driver will not be aware of any change in handling. Therefore, we feel this substitution is warranted.

It is our intention to keep our dealer organization completely cognizant of running production changes on all Shelby American vehicles.

Sincerely

H. A. Bracken  
General Sales Manager
