SUBJECT: 427 Engines from Shelby American

Shelby American has 427 C.I.D. Ford engines for sale. These engines are not blue printed but they were produced by Ford Motor Company on their assembly line. The engines have the following equipment:

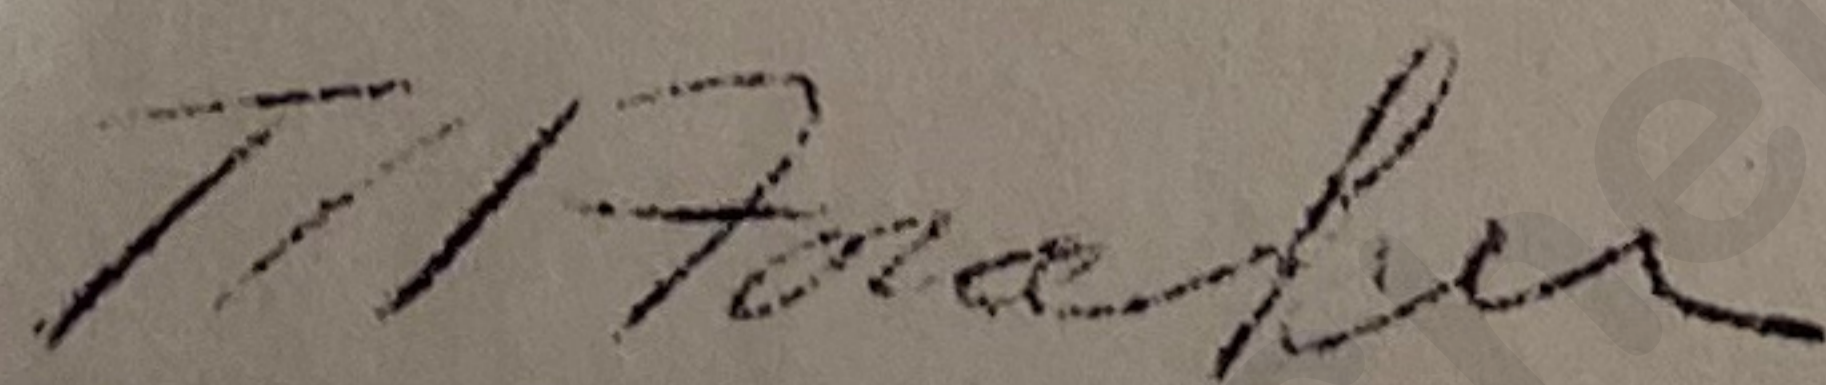

- Cross-bolted main caps
- Medium riser 4V aluminum intake manifold
- Holley 780 carburetor with center pivot floats
- Transistorized ignition system
- Chrome valve covers
- High performance exhaust manifold
- Bell housing complete
- Clutch and pressure plate assembly

The above engines come complete except for fuel pump, air cleaner, alternator, starter, fan, fan belt, and engine mounts. The part number for this basic engine is C6AZ-6007-V. The suggested retail price is \$1313.00 and the dealer cost is \$ 985.00. Since each engine weighs over 200 pounds, all freight charges are paid by Shelby American.

Two additional items are required for installation of this engine with transistorized ignition system. The items are as follows:

<u>PART NUMBER</u>	<u>DESCRIPTION</u>	<u>RETAIL</u>	<u>DEALER</u>
C3TZ-12A046-B	Block, Resistor	\$ 4.00	\$ 2.40
C3TZ-12A027-C	Amplifier, Ignition	\$40.90	\$24.54

If you desire to order these engines, please contact Chuck Green at Shelby American via telephone or submit your order on the regular Shelby American order form. Thank you for your consideration of this matter.
